

Step 1: Creating an API User and Getting API Keys from Autotask

1. Log into Autotask and navigate to the menu on the left and hover over **Admin** and click on **Resources (Users)**

2. Hover over the downward arrow at the top left of the window and click on **New API User**

3. Fill out the necessary fields under the **GENERAL** area

- Set the **First Name** to Zen
- Set the **Last Name** to Contract

- Set the **Email Address** to anything - it won't be used for our API purposes, so even test@test.com will work
 - Set the **Security Level** to API User (system) or the highest option to prevent sync and view permissions later
4. Generate the API keys under the **CREDENTIALS** area
 - Click the **Generate Key** button to generate a user key. *Make sure to copy and paste that key to a separate area, like Notepad or Word, for later usage.*
 - Click the **Generate Secret** button to generate a secret password. *Make sure to copy and paste that key to a separate area, like Notepad or Word, for later usage. This will not be accessible later so **DO NOT MISS THIS STEP.***
 5. Select the vendor from the dropdown in the **API Tracking Identifier** section. **REQUIRED.**
 - Ensure **Integration Vendor** is selected.
 - Scroll through the list to find and select **Zen Contract – Contract & Proposals**
 6. For the **Line of Business** field, drag over all relevant line items. Drag over all if you're not certain which ones are right.

LINE OF BUSINESS

A line of business can be used to grant access or prevent access to data associated with Contracts, Tickets, Projects, etc.

Not Associated

Empty list box for Not Associated lines of business.

Associated

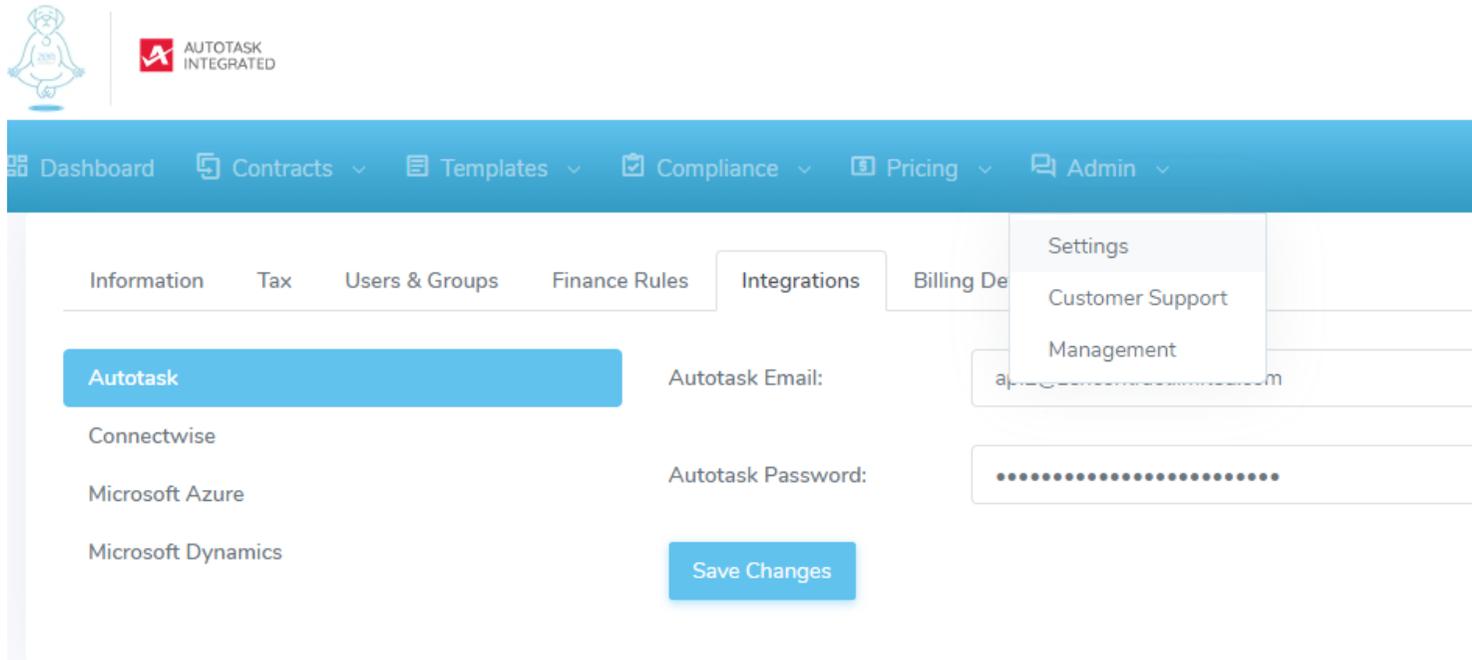

General > IT Services
General > Software Development

Resource can view items with no assigned Line of Business

7. Click **Save & Close** at the top once of this window once you've copied over both keys and ensured all fields are set correctly.

Step 2: Entering the API keys from Autotask into ZenContract

1. Navigate to your ZenContract tenant and go to **Admin > Settings > Integrations**

2. Select **Autotask**

3. Enter the information from Autotask

- **Autotask Email**, enter the username (key) you copied earlier from Autotask
- **Autotask Password**, enter the password (secret) key you copied earlier from Autotask

4. Click on **Save Changes**

All done! Your ZenContract is integrated with Autotask.
